EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David N. Weiss on 9/01/2005.

The application has been amended as follows:

Cancelled claims 22-24.

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a vehicle collision warning system. Each independent claim identifies the uniquely distinct features "a sensor coupled to a processor, wherein processor is configured to determined and generated a warning signal of a potential collision, a turn signal inhibition apparatus coupled to a processor and configured to inhibit movement of a turn signal stalk in response to the collision warning signal" in combination with the manner claimed. The closest prior art, Rothkop et al. [US 6,812,833] discloses a turn signal stalk generating a tactile feedback which indicating an object sensed by vehicle side sensor, either singularly or any combination, fail to anticipate or render the above underlined limitations obvious. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
